Roper Rhodes Trade solutions is a range of quality, good value bathroom products, providing you with a one stop shop for all the essentials you need to complete your latest job to the highest standards.

**Product Quality**

We've been making bathrooms exclusively for the British and Irish markets for over 40 years. Therefore, we understand the oddities and awkward layout of British bathrooms and design from the ground up to make them easy to fit for fitting professionals. When it comes to choosing materials, we select the highest quality components to work in the bathroom environment which will withstand the rigours of daily use.

**Guarantees**

We provide comprehensive guarantees on many of our products. See product pages for specific detail.

## Contactless Dual Flush Sensor

The contactless flush sensor kit is compatible with pneumatic concealed cisterns as shown on page 4, and is best used within furniture. It provides a touchless flush, with just a wave of a hand.

The sensor works using capacitive sensor technology to detect a change in the electromagnetic field. A short wave of the hand in front of the sensor activates the reduced flush, whereas holding your hand up slightly longer triggers a full flush. It is powered by 4 AA batteries which will last around a year under normal domestic conditions.

The sensor can be mounted behind a back to wall WC unit fascia, or under a worktop or tiled wall near the cistern. A discreet black decal is included to indicate sensor location if desired.

## Contactless Dual Flush Sensor Plate

Place your hand in front of the black glass-fronted flush plate to activate either a reduced or full flush. Recommended for in-wall installations.

Features include:

- Contactless flushing
- Powered by 4x AA batteries (easy to change, no tools required)
- Low battery power alarm battery life in excess of 1 year)
- Dual flush
- Manual override flush
- Illuminates on operation
- Use on wall hung frames & In-wall cisterns (not compatible with slim depth furniture)

## Close coupled sensor flush kits

With a simple wave of the hand, hygienic, contactless flushing is now here for close coupled WCs. Two sizes are available depending on the size of the flush button hole in the cistern lid. The button kits have been designed to retro-fit to existing WCs which have paddle operated flush valves. For cisterns which have pneumatic or cable operated flush valves, or where the button screws in directly to the flush valve, then the flush valve will also need to be swapped to our TR9033 valve which has a 2" base.

### Smartflow bath filler

With the Smartflow bath filler water runs into your bath through the filler rather than a traditional bath mixer tap. Mounted on the inside of the bath, the Smartflow acts as a combined filler and overflow and comes with a click waste. It can be used with a manual mixer valve as a simple bath filler, or connect it to a diverter valve to control both bath and shower outlets.
